

A215-6-7-8
A238 ADDIFIN PASTES
BLACK, ORANGE, YELLOW, RED, GREEN

Product :

Addifin paste are highly concentrated, free-flowings, water-based pigmented preparations.

Introduction:

Addifin paste contain in addition to water mainly non-ionic wetting agents, water-miscible dimeric glycol derivatives, and small amounts of preservatives.
They are A conventional emulsion paints for interior and exterior use.
They have a minimum tendency to dry out and are largely insensitive to frost.
Unlike the Addifin preparations, contain practically no organic solvent . They can therefore be used to formulate so-called "solvent-free emulsion paints" as stains.

Processing :

Colour preparations are best incorporated into the 18000/CONC by stirring vigorously. Should speckles develop due to a rapid change of concentration, a two-step process may be preferred: 1. prepare a concentrated product (18000/CONC 10% + 2 – 15% A215-6-7-8 A238), 2. incorporate in the remaining 18000/CONC.

Available colours:

A215 Addifin pasta black A216 Addifin pasta orange, A217 Addifin pasta yellow, A218 Addifin pasta red, A238 Addifin pasta green.
The Addifin preparations are adjusted to control constantly shade and colour strength.

Storage:

If kept in unopened original containers and at temperatures between +10°C and 50°C, the product can be stored for 8 months. Once opened, a container's content should be used up within a short time.

General notes :

Always mix the products before use
