

### TO WHOM IT MAY CONCERN

This is to certify and acknowledge that we at Pentagon Ltd., have used Colorama's Aquaproof - water proofing liquid membrane, in several flat roof projects. These roofs were previously coated with different coatings including cementitious layers, but failed to protect against water penetrating leading to damage below.

Since we started using Aquaproof, we have not had any complaints or revisited the same site again to revise the job. It proved to provide a flexible membrane which gave an excellent waterproofing layer. We also found Aquaproof to be easy to apply with a roller as well as when sprayed.

Colorama has been in the business for over 20 years and has successfully developed systems that are of high performance while still cost effective. Their technologies, expertise, and professionalism is the reason why they are our first choice, and have already started exploring their technologies in other projects.

Yours Truly,

*Ragab M. Abouelnabagel*

A handwritten signature in blue ink, which appears to be "Ragab M. Abouelnabagel", is written over a green and blue "Pentagon" logo.
